## ABOUT ME

I am a **programmer** who focuses on web development, especially the **front end** engineer of the **JavaScript** programming language. Have knowledge of various programming languages such as **HTML, CSS, Javascript, PHP**. And has mastered several relevant frameworks today such as **ReactJS, Bootstrap, TailwindCSS** and also **Laravel**.

## MY WORK EXPERIENCE

- **Building a Covid Tracker Web (Aug 2021)**  
With my knowledge about php programming language and understanding concept REST API, I build a web to track covid-19 growth in indonesia for my school.
- **Make an E-commerce Website (Sep 2021)**  
After i finished my Bootstrap lesson, I asked my friend if i can make his clothing store a website. And he say yes you can, so I make the website for him.
- **Make a Company Profile for PT. Fathi Lintas Asia (Mar 2022)**  
My friend's brother has a company engaged in tour and travel, and my friend asked me to help him make a company profile. I made it using HTML, CSS, Javascript and using TailwindCSS.
